

INSULATING

THERMAL PARTITIONS · THERMAL PALLET COVERS · THERMAL ASSEMBLY SET FOR CONTAINERS · THERMAL ASPHALT DUVETS

THERMAL SOLUTIONS

COMBI-THERM THERMAL SOLUTIONS

THERMAL PARTITIONS

Effective thermal separation of temperature-sensitive goods.

- Low weight
- Easy, rapid installation.

The thermal partition enables one transport to include different types of goods – e.g. frozen goods, dairy products, fruit and general cargo.

Please see illustration.

Hygienic/space-saving/easy handling

THERMAL PARTITIONS

Effective thermal separation of temperature-sensitive goods.

- Low weight
- Easy, rapid installation.

The thermal partition enables one transport to include different types of goods – e.g. frozen goods, dairy products, fruit and general cargo.

Hygienic/space-saving/easy handling.

THERMAL AIR CARGO COVERS

Ideal protection for temperature-sensitive shipments.

Such as Pharmaceutical, fruits, vegetables and floral products.

Unique Reflective Performance against solar radiation.

Contains of 2 parts: 1 bottom part and 1 top part.

Dimensions:

Width from 60 - 244 cm.

Length from 80 - 322 cm.

Height from 100 - 170 cm.

THERMAL COVERS

High-insulating cover for transporting temperature sensitive goods:

- Food products
- Medicine
- Blood products
- Chemical products

THERMAL ASSEMBLY SET FOR CONTAINERS

The assembly set is ideal against large variations of temperature transporting fruit – vegetables – chemicals a.s.o..

The sets are fast and easy to mount and dismount.

All sets are universal to 178 cm in pallet height with a container in a broadness of 247 cm.

THERMAL ASPHALT DUVETS

COMBI-THERM thermal asphalt duvet has been developed to prevent the cooling of hot asphalt when transporting it from the mixing plant to the construction site.

The asphalt duvet weighs only approx. 525 g/m².

COMBI-THERM

Combi-Therm A/S is the leading manufacturer of flexible insulating packaging and industrial products.

Combi-Therm was founded in 1979 as the first manufacturer specialising in a complete assortment covering the cold-chain.

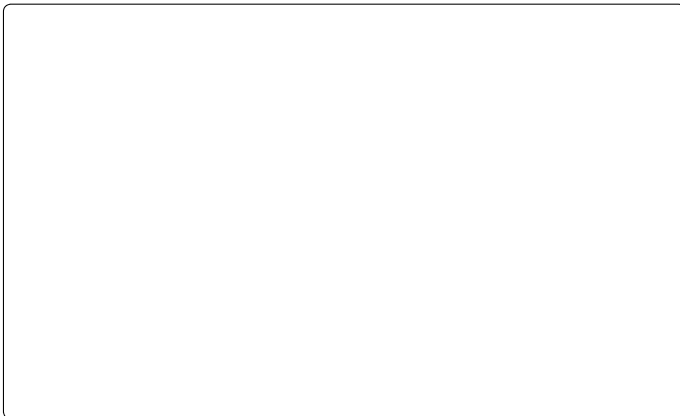

As a result of our continuous product development, today we can offer thermal solutions for different areas, including the medical, chemistry and windmill Industries and retailchains.

Over the years the assortment has been expanded with products of a more technical nature, such as insulation of moulds from -40° to $+220^{\circ}$ Celsius.

Apart from a wide range of standard products, which can be found in our leaflets, we have delivered many different products for a wide variety of uses where insulation and moulding are required.

The products are produced with help of the state of the art technology in our production facilities situated in Them and Randers, which makes it possible to manufacture quality products at competitive prices.

One of Combi-Therm's strengths is our ability to manufacture (customise) the best possible solutions for insulation in cooperation with our customers.
